Summary

Senior program and operations professional leading cross-functional initiatives across QA, Production, Engineering, Data, and external vendors. Experienced in program delivery, operational governance, data platforms, executive reporting, process automation, and self-service tooling within a large-scale technology environment. Agile practitioner with CSM and CSPO certifications and hands-on experience with SQL, Jira, Airtable, Confluence, Tableau, and Superset.

Experience

Senior QA Analyst, QA PMO, Netflix Games

2025 – Present

Technical Program Management, QA Data & Operations

- Drive cross-functional PMO initiatives across QA, Production, Engineering, Data, and external vendors, from scoping through delivery, aligning stakeholders on plans and release-readiness decisions.
- Authored PRDs for the data platform, ingestion pipeline, and stakeholder-facing data UI, defining user requirements, workflows, dependencies, and acceptance criteria before development.
- Built and launched an AI-powered Slack assistant giving developers, producers, and QA self-serve access to accessibility requirements, and authored the supporting accessibility testing best practices, reducing dependence on individual SMEs.
- Authored an org-wide knowledge-sharing program and ran data training and office hours, teaching teams to find, validate, and interpret operational data for self-service dashboards and leadership reporting.

Senior QA Analyst, Compliance QA, Netflix Games

2024 – 2025

- Built governance and operational triage dashboards unifying release-readiness exceptions, violations, waivers, and aging issues across products, and migrated the reporting stack from Preset to Tableau, giving leadership clearer visibility into risk and decision points on a supported platform.
- Built a self-service operations data platform and team-owned schema, including a vendor-performance pipeline that ingested external logs from Amazon S3 into internal systems, enabling non-technical users to manage readiness, risk, and vendor-effort data without SQL.
- Led reporting automation and operating standards (SOPs, decision logs, documentation guides) and coordinated a tools initiative spanning intake design, evaluation, and rollout.

QA Analyst, Compliance & Compatibility, Netflix Games

2022 – 2024

- Owned release readiness, platform and device compatibility, and launch support across multiple game titles in a large-scale consumer platform, coordinating Product, Engineering, and QA toward aligned launch decisions.
- Led defect triage, root-cause analysis, and cross-functional issue resolution, reducing investigation timelines and improving delivery predictability.
- Facilitated stakeholder communication, escalation, and operational coordination throughout release cycles under shifting priorities.

QA Engineer II, The LEGO Group

January 2021 – December 2022

- Performed Scrum Master duties for a cross-functional engineering team, facilitating sprint planning, backlog refinement, retrospectives, and delivery planning.
- Partnered with Product Owners to identify delivery risks, remove blockers, and improve sprint predictability.
- Improved regression cycle time by 40% through workflow and process improvements.

QA Engineer, iTrustCapital

January 2021 – December 2022

- Led automation initiatives across mobile, backend, and API validation, reducing regression execution time by 35% and improving release quality and deployment confidence.

Business Analyst to QA Analyst, Mint Mobile

May 2018 – January 2021

- Coordinated feature validation and release readiness across iOS and Android in an Agile environment, partnering with Product Managers and Engineering to refine requirements and track milestones.
- Reduced testing cycle time by 20% through process improvements.

Skills

Program & Operations: Program Management, PMO Operations, Cross-Functional Delivery, Stakeholder Management, Risk & Dependency Management, Executive Reporting, Agile/Scrum, Process Improvement

Data & Platforms: SQL, Tableau, Superset, Airtable, Google Sheets, Data Operations, Dashboard Development

Tools: Jira, Confluence, Lucidchart, Miro, ChatGPT, Claude

Certifications

Certifications: Certified ScrumMaster (CSM) · Certified Scrum Product Owner (CSPO) · IBM Business Intelligence Analyst

Professional Development: AI: Business Strategies & Applications, UC Berkeley · UX Research & Prototyping, UC San Diego

Education

B.S., Psychology — St. Joseph's College of Quezon City

Graduate coursework: MBA and M.A. Counseling Psychology — California State University, Long Beach & Ateneo de Manila University
